Sage Pearl

Denim Moss

Smart Design

IceStone is made from three core ingredients: 100% recycled glass, portland cement, and non-toxic pigments. There are no harmful resins or petrochemicals in IceStone, so it's safe for people and for the planet.

IceStone slabs are fabricated and cared for like natural stones. To maintain the surface, IceStone must be sealed and waxed.

Green Building

IceStone surfaces can contribute points to LEED projects for high recycled content, low-emissions, social responsibility, sourcing and manufacturing location.

Common Applications:

Countertops Tables
Backsplashes Vanities
Desktops

Alpine White

Property	Test Standard	IceStone Results
Compressive Strength	ASTM C – 109	13,000 psi - 16,000 psi
