Canvas

Natural and understated

The beauty of Canvas surfaces is about being natural and understated. These tiles are designed to be versatile and subtle, featuring a delicate glimmer effect and a tactile finish that doesn't favour a specific direction through patterns that guide the user's gaze. The relief feature was especially designed for Canvas tiles. This carefully calculated combination of personality and restraint doesn't draw the eye in a harsh or demanding way. Instead, Canvas tiles can support any spatial concept with poise, by underlining an interior gently and allowing space for life to unfold organically, both in terms of looks and function. These characteristics make the tiles well-suited for multifunctional interiors.

Canvas' range of nine colors has been carefully chosen to adhere to the series' overall high-quality aesthetic and subtle character. Spanning cool and warm colors, in a variety of shades that feel at home next to each other, the Canvas colors are inspired by nature. Just like a pointillist painting, each tile is a composition of myriad speckles - ceramic flakes - that come together to achieve a beautiful, harmonious end product.
